2. PREREQUISITES: There are no prerequisites for this course, other than an interest in linguistics and a good English language proficiency level.

3. COREQUISITES: Level B2 in the CEFR

4. SUBSEQUENT COURSES: Introduction to English Linguistics 2

5. COURSE DESCRIPTION:

This course is a general introduction to English linguistics. It is designed for ELT and English linguistics students. The course will focus primarily on the four core areas of linguistics: phonetics and phonology (the sounds of English and how they are classified or combined), morphology (how words are formed from smaller units of meaning), syntax (how words come together to form sentences), and semantics (the study of meaning of words and larger linguistic units).
Broader topics of linguistics such as pragmatics, sociolinguistics, psycholinguistics, language acquisition will be explored in the second module of this course.

6. COURSE OBJECTIVES :

- In terms of knowledge: The course offers students insight into English phonetics and phonology, morphology, syntax and semantics through the medium of English. It also provides the foundation needed for subsequent study in TESOL / applied linguistics. It is expected that by the end of the course, students should be able to understand and work with basic concepts and methodologies in linguistic science, to analyse language in terms of its phonology, morphology, syntax and semantics, and to discuss linguistic issues in an informed way with both linguists and non-linguists.

- In terms of skills: To encourage students to think critically, discuss the issues with classmates and teachers and question what they or written resources say. To give students an opportunity to present their own ideas and those of others in a logical way.

- In terms of attitude: To teach students to be serious and honest in studying, taking exams and carrying out research.
